

Microtome Knife Sharpening

Fast turn-around and guaranteed sharp as new knives. Simply mail your knife to Hacker along with a decontamination certification and we'll get it back out to you, usually in 24 hours.

We sharpen all standard steel knives - profiles "A", "B", "C", & "D". If your A or B knife (hollow profile) have already been re-sharpened like a C profile knife, it is impossible to restore the original profile. These knives can only be re-sharpened with a C profile.

The H/I method does not grind away the large bevel generated by much re-sharpening. If you want the bevel removed, please send your knife first to a machine-shop for surface grinding. H/I can then accept it for sharpening. Note however, that removal of such metal can, on some knives, expose softer metal which may sharpen but will not hold an edge for very long. Such knives are best replaced. The H/I method, while less cosmetic, usually extends the useful life of the knife

For safety, please ship knives only in properly fitted containers.

Knife Size	Price USD
8 cm	\$65.00
10 cm	\$65.00
11 cm	\$75.00
12 cm	\$75.00

Knife Size	Price USD
14 cm	\$85.00
16 cm	\$100.00
18 cm	\$100.00
20 cm	\$135.00

Knife Size	Price USD
22 cm	\$135.00
25 cm	\$140.00
30 cm	\$175.00

PROFILE	CHARACTERISTICS	APPLICATION
"A" 	Plane: very concave, hollow Ground blade with extra-thin cutting edge	Fresh specimens, alcohol-hardened objects, soft celloidin objects
"B" 	Plane: slightly concave, hollow Ground blade with less thin cutting edge	Soft paraffin objects, harder celloidin objects
"C" 	Plane: both sides (wedge shaped) Standard Profile	Paraffin objects, frozen objects, hard celloidin objects
"D" 	Plane: both sides (wedge shaped) Steep cutting edge	Extra-hard objects such as leather, rubber, paper, film, wood, plastics

Knives can be shipped to:
Hacker Industries
1132 Kincaid Bridge Road
Winnsboro, SC 29180
